

CONCEPT

A gradient website background that responds to user interaction with changing colors/patterns as well as additional type layer to create an animated landing page.

INPUTS

Desktop

- Mouse move

- Mouse click

- Text Entry

Mobile

- Scrolling

- Phone movement

- Text Entry

OUTPUTS

Gradient/screen elements/color change (with ease) based on mouse/click/tap position on screen.

User-entered text will interact with the animated background gradient

WIREFRAMES/FLOW

User moves mouse, taps screen, or enters text and the background responds with changing colors. Besides the background, only a cursor appears on screen.
